

Stem Cell Awareness and Registration Drive 15/09/2023

On 15th September 2023 an awareness lecture by Arjan Vir Foundation in coordination with the Life Sciences Department was held at Babbar Khalsa College Garhshankar. The convener of the foundation Mr Naresh Gupta explained in a very simple way about stem cells and motivated the staff members and students to become the members of this campaign. One man's effort can save the life of others. The founder of the foundation Mrs Simi Singh narrated her own story how she lost her son due to blood cancer. Her son could be saved with stem cells but unfortunately couldn't find any donor. So she promised to move door to door and aware people about what stem cells (bone marrow) are and how they are useful. She also encourage people to register with them by giving swap for stem cell registry, so that we can save anyone's life from leukemia and other blood disorders. Principal Madam Lakhwinderjeet Kaur welcomed the honorary guests. Faculty members honored them with Croton plants. Dr Manbeer Kaur organized the event very well.
