The Institution of Engineers (India)

The Institution of Engineers (India) [IEI] is the largest multi-disciplinary professional body of engineers, established in 1920 with its Headquarters located in Kolkata and incorporated under Royal Charter on 9th September, 1935 by the then His Majesty of King George V. The Royal Charter endowed the Institution with the responsibility to promote the general advancement of engineering amongst its members and persons attached to the Institution. After Independence, the Institution is a "Body Corporate" protected under Article 372 of the Constitution of India. The Institution of Engineers (India) is administered by a National Council with the President as its Head.

The Institution has been serving the engineering fraternity for over a Century with its national and international presence through 125 Centres spread all over India, 6 Overseas Chapters, 6 Fora and an Organ namely Engineering Staff College of India (ESCI), Hyderabad. The Institution encompasses 15 (fifteen) engineering disciplines with a Corporate membership of over 2 lakhs.

About Punjab & Chandigarh State Centre

The Punjab State Centre of the Institution of Engineers was located at Lahore before partition of India. After 1966, when Haryana and Himachal established their separate centre, this Centre was named as Punjab & Chandigarh State Centre. The foundation stone of this building was laid in 1966 by Sardar Pratap Singh Kairon, the then Chief Minister of Punjab. Located in center of city beautiful and equipped with all kind of infrastructure to organize such seminars.

About B.A.M Khalsa College

The B.A.M Khalsa College The best college in Kandi area of Garhshankar, established in 1969 caters to the growing demand for qualified technical personnel in different streams. Since its inception, the college has always been at the forefront of innovation and has attained a leading position in the field of technical and professional education. It has been recommended by many previously passed students and is considered as the best degree college in Garhshankar . It is poised to

grow bigger and better as well as continues to seek solutions on important global problems, educating leaders to make the world a better place.

About Department of Computer Science and Applications

In view of the increasing importance of the computer science discipline, a separate Department of computer science and applications was established in 1999 to offer Bachelor degree in computer science and applications and Post-Graduate diploma in computer applications .It enables you to work in multidisciplinary environments and get responsive to the changing needs of the society. Incorporating a detailed mix of software and hardware engineering, this program can be defined as the application of a systemic, disciplined, and quantifiable approach to development, operation and maintenance of computer-related technicalities.

About Department of Commerce and Economics

The Department of Commerce was established in the year 1998 with a vision of providing excellence in the fields of Commerce and management by imparting quality and value based education in this rural and 'Kandi Area' of Punjab. Over the years, this department has carved an enviable niche in the field of Commerce and management education and got Master of Commerce (M.Com.) in 2012. In February 2021, the Department of Economics was merged with the Department of Commerce and it became "Department of Commerce & Economics".

The department is proud to be the Alma Mater of many Chartered Accountants. Since its inception, the primary aim of the department has been to make the commerce students respond to changing social realities through the development and application of knowledge.

ground around the world. It is a new tool for maximizing benefits for the various organizations and provides an integrated view of statistics that can be used to monitor, perform key signals, diagnose and identify hidden patterns in cost factors. Intelligent computing techniques provide an effective computational methods and robust environment for business intelligence in the marketing domain. The efficiency of the Business Intelligence is determined by the efficiency of the intelligent computing techniques and methods used. It has been an undisputed fact that India has emerged as the most preferred destination and outsourcing hub for various IT Software Development Services, Bio-technology, ERP, Data Warehousing, Knowledge Management and other IT related customer care services. These issues are strategic keys of future oriented researches. Professionals need to be aware of current technology trends and stay close to them. Contemporary technology trends are dynamic and new evolving in data management, data quality, web service applications and software.

The main objective of the conference is to promote research and developmental activities in Business Intelligence with Intelligent computing techniques. By organizing this conference, we sincerely hope to support development of these researches and technologies.
